```

file 006 und 007 sind gleich

2. Welches Betriebssystem war auf dem Computer installiert?

file filename reveals '...DOS/MBR boot sector MS-MBR XP english at offset 0x12c...'

3. Wann wurde das Betriebssystem installiert?

ctrl + f 'InstallDate' ctrl + shift + l to select all matches finds :

/cybersecurity_project/WINDOWS_system32_config_software.txt

```

/Microsoft/Windows/CurrentVersion/Installer/UserData/S-1-5-
18/Products/0B79C053C7D38EE4AB9A00CB3B5D2472/InstallProperties/InstallDate,SZ,20
040819, /Microsoft/Windows/CurrentVersion/Installer/UserData/S-1-5-
18/Products/111E13C6BB69CDA4C9186E3DEEDD8D3D/InstallProperties/InstallDate,SZ,20
040820,
/Microsoft/Windows/CurrentVersion/Uninstall/WinPcapInst/InstallDate,SZ,08/27/200
4, /Microsoft/Windows/CurrentVersion/Uninstall/{350C97B0-3D7C-4EE8-BAA9-
00BCB3D54227}/InstallDate,SZ,20040819,
/Microsoft/Windows/CurrentVersion/Uninstall/{6C31E111-96BB-4ADC-9C81-
E6D3EEDDD8D3}/InstallDate,SZ,20040820, /Microsoft/Windows
NT/CurrentVersion/InstallDate,DWORD,0x41252E3B, the most relevant is
'InstallDate,SZ,20040820, /Microsoft/Windows NT/CurrentVersion/InstallDate,DWORD,0x41252E3B' the
hexavalue is a unix timestamp and can be converted with date -d @$(printf "%d" 0x41252E3B)
which reveals :Thursday, August 19, 2004 10:48:27 PM

```

4. Welche Zeitzoneneinstellungen waren konfiguriert?

ctrl + f 'TimeZoneInformation' ctrl + shift + l finds:

```

'/ControlSet001/Control/TimeZoneInformation,KEY,,2004-08-19 17:20:02
/ControlSet001/Control/TimeZoneInformation/Bias,DWORD,0x00000168,

2004 Desktop.ini
```

Der Benutzer Mr. Evil nutzt den Computer am häufigsten, da sich im Verzeichnis Documents and Settings/Mr. Evil/Recent mehrere zuletzt genutzte Dateien und Verknüpfungen befinden, die auf eine aktive Nutzung hinweisen.

11. Welcher Benutzer war zuletzt am System angemeldet?

welcher benutzer war zuletzt angemeldet?

```
grep -i 'DefaultUserName' ./hive_decoded/*  
./hive_decoded/_mnt_SCHARDT_001_008_WINDOWS_system32_config_software.sav.txt:/Microsoft/Windows NT/CurrentVersion/Winlogon/DefaultUserName,SZ,,  
./hive_decoded/_mnt_SCHARDT_001_008_WINDOWS_system32_config_software.txt:/Microsoft/Windows NT/CurrentVersion/Winlogon/DefaultUserName,SZ,Mr. Evil,  
./hive_decoded/_mnt_SCHARDT_001_008_WINDOWS_system32_config_software.txt:/Microsoft/Windows NT/CurrentVersion/Winlogon/AltDefaultUserName,SZ,Mr. Evil,
```

12. Eine Suche nach dem Namen Greg Schardt führt zu mehreren Treffern.

Einer davon beweist, dass Greg Schardt mit „Mr. Evil“ identisch ist und Administratorrechte auf diesem System hatte. o Frage: Wie heisst diese Datei und mit welchem Softwareprogramm steht sie in Verbindung?

13. Welche Netzwerkkarten wurden in diesem Computer verwendet?

```

Xircom CardBus Ethernet 100 + Modem 56 (Ethernet Interface)

Compaq WL110 Wireless LAN PC Card

Texas Instruments PCI-1225 CardBus Controller (2 Einträge)
```

Das sind die eindeutigen Netzwerkkarten aus den DriverDesc-Einträgen.

14. Dieselbe Datei enthält die IP-Adresse und MAC-Adresse des Computers.

Wie lauten diese? /ControlSet002/Services/{6E4090C2-FAEF-489A-8575-
505D21FC1049}/Parameters/Tcpip/IPAddress,MULTI_SZ,0.0.0.0, /ControlSet002/Services/{6E4090C2-FAEF-
489A-8575-505D21FC1049}/Parameters/Tcpip/SubnetMask,MULTI_SZ,0.0.0.0,
/ControlSet002/Services/{6E4090C2-FAEF-489A-8575-
505D21FC1049}/Parameters/Tcpip/DefaultGateway,MULTI_SZ,, /ControlSet002/Services/{6E4090C2-FAEF-
489A-8575-505D21FC1049}/Parameters/Tcpip/DhcpIPAddress,SZ,192.168.1.111,

also 192.168.1.111 via DHCP

15. Mithilfe der MAC-Adresse kann über eine Internetrecherche der Hersteller der

Netzwerkkarte ermittelt werden. Die ersten drei Hexadezimalstellen der MAC- Adresse identifizieren den Hersteller. o Frage: Welche Netzwerkkarte wurde während der Installation und Einrichtung von LOOK@LAN verwendet? ConfigFile=C:\Program Files\Look@LAN\irunin.dat
LanguageFile=C:\Program Files\Look@LAN\irunin.lng ImageFile=C:\Program
Files\Look@LAN\irunin.bmp /mnt/SCHARDT_001_008/Program Files/Look@LAN/irunin.ini
%LANNIC%=0010a4933e09 -> 00:10:A4:93:3E:09 MAC Address: 00:10:A4:93:3E:09

Manufacturer: Nokia (OUI 0010A4) Network Card Used: Likely an older Nokia network interface card (NIC) or embedded adapter.

This matches the installation environment (Windows XP era, based on %ISWINXP%=TRUE in your config).

16. Nennen Sie sechs installierte Programme, die möglicherweise für Hacking-Zwecke

verwendet wurden. /mnt/SCHARDT_001_008/Program Files\$ ls 123WASP folder.htt 'Online Services' Accessories GlobalSCAPE 'Outlook Express' Agent 'Internet Explorer' 'PLUS!' Anonymizer Look@LAN 'Uninstall Information' Cain Messenger Whois CHAT 'microsoft frontpage' 'Windows Media Player' 'Common Files' mIRC 'Windows NT' 'ComPlus Applications' 'Movie Maker' WindowsUpdate desktop.ini MSN WinPcap DirectX 'MSN Gaming Zone' xerox Ethereal NetMeeting 'Faber Toys' 'Network Stumbler'

1. Cain

Typ: Passwort-Cracker / Netzwerk-Sniffer

Hacking-Relevanz:

Kann gespeicherte Passwörter (z. B. aus Browsern, WLAN) auslesen.

Führt ARP-Spoofing (Man-in-the-Middle-Angriffe) durch.

Brute-Force-Angriffe auf Hashes (LM/NTLM, WPA).

2. WinPcap

Typ: Paket-Sniffing-Treiber

Hacking-Relevanz:

Wird von Wireshark, Nmap, Cain genutzt, um Netzwerkverkehr abzufangen.

Ermöglicht Passwort-Diebstahl (z. B. unverschlüsselter HTTP-Traffic).

3. Ethereal (heute Wireshark)

Typ: Netzwerk-Protokoll-Analyzer

Hacking-Relevanz:

Sniffing von unverschlüsselten Daten (FTP, Telnet, HTTP).

Analyse von Angriffsversuchen (z. B. Port-Scans, Exploits).

4. mIRC

Typ: IRC-Client

Hacking-Relevanz:

Wurde oft für Botnet-Kommunikation genutzt (z. B. via IRC-Bots).

Scripting-Funktionen (mIRC-Skripte) für Automatisierung von Angriffen.

5. Network Stumbler

Typ: WLAN-Scanner

Hacking-Relevanz:

Findet ungesicherte WLANs (War-Driving).

Zeigt SSIDs, Signalstärke & Verschlüsselungstypen an.

6. Look@LAN

Typ: Netzwerk-Monitoring-Tool

Hacking-Relevanz:

Scannt Hosts, offene Ports & Dienste (Reconnaissance).

Kann für Schwachstellen-Scans im LAN genutzt werden.

17. Wie lautet die SMTP-E-Mail-Adresse von „Mr. Evil“?

```
reglookup "/mnt/SCHARDT_001_008/Documents and Settings/Mr. Evil/NTUSER.DAT" > NTUSER.DAT.txt
```

```
/Software/Microsoft/Internet Account Manager/Accounts/00000001/SMTP Server,SZ,smtp.sbcglobal.net,  
/Software/Microsoft/Internet Account Manager/Accounts/00000001/SMTP Display Name,SZ,Mr Evil,  
/Software/Microsoft/Internet Account Manager/Accounts/00000001/SMTP Email  
Address,SZ,whoknowsme@sbcglobal.net,
```

18. Welche NNTP-Einstellungen (Newsserver) sind für Mr. Evil konfiguriert?

Ergebnis:

Newsserver:

news.dallas.sbcglobal.net

Registry-Pfad:

/Software/Microsoft/Internet Account Manager/Accounts/00000002/ Weitere SMTP-Details: Schlüssel Wert
SMTP Server smtp.sbcglobal.net SMTP Display Name Mr Evil SMTP Email Address
whoknowsme@sbcglobal.net

Weitere NNTP-Einstellungen: Schlüssel Wert NNTP Server news.dallas.sbcglobal.net NNTP User Name
whoknowsme@sbcglobal.net NNTP Password2 (verschl.) %01%02n%00e%00w%00s... NNTP Display Name
Mr Evil NNTP Email Address whoknowsme@sbcglobal.net Connection Type 0x00000003 (vermutlich "LAN")

19. Welche zwei Programme zeigen diese Informationen?

Die Informationen über SMTP/NNTP-Konten, Server, Benutzernamen und Passwörter stammen aus der
Windows-Registry, genauer gesagt aus dem Hive NTUSER.DAT im
Pfad:/mnt/SCHARDT_001_008/Documents and Settings/Mr. Evil/NTUSER.DAT

20. Nennen Sie fünf Newsgroups, in denen Mr. Evil angemeldet ist.

email verkehr kann auch hier gefunden werden `sudo apt install undbx sudo undbx`
"/mnt/SCHARDT_001_008/Documents and Settings/Mr. Evil/Local Settings/Application
Data/Identities/{EF086998-1115-4ECD-9B13-9ADC067B4929}/Microsoft/Outlook
Express"

Fünf Newsgroups:

```
alt.2600.cardz  
alt.2600.crackz  
alt.2600.hackerz  
free.binaries.hacking.computers  
alt.binaries.hacking.utilities
```

Diese Gruppennamen stammen direkt aus den .dbx-Dateinamen. Outlook Express speichert für jede
abonnierte Newsgroup eine separate .dbx-Datei. Die Namen vor .dbx entsprechen dabei exakt den Namen
der Newsgroups.

21. Ein beliebtes IRC-Programm namens mIRC war installiert.

o Frage: Welche Benutzereinstellungen wurden angezeigt, als der Nutzer online war und einen Chatraum
betreten hatte? in der datei : /mnt/SCHARDT_001_008/Program Files/mIRC/mirc.ini Die
relevanten Benutzereinstellungen, die Mr. Evil beim Betreten eines Chatraums angezeigt wurden, sind:

```
user: Mini Me  
email: none@of.ya  
nick: Mr  
anick (Alternativnick): mrevilrulez  
host: Undernet: US, CA,  
LosAngelesSERVER: losangeles.ca.us.undernet.org:6660GROUP:Undernet
```

Diese Werte geben seinen sichtbaren Nickname, Alternativnick, Benutzernamen, E-Mail und den Server/Host an.

22. Dieses IRC-Programm kann Chat-Sitzungen aufzeichnen.

o Frage: Nennen Sie drei IRC-Channels, die der Nutzer betreten hat. /mnt/SCHARDT_001_008/Program Files/mIRC/logs\$ ls -latrh total 26K drwxrwxrwx 1 root root 4.0K Aug 20 2004 . -rwxrwxrwx 2 root root 148 Aug 20 2004 '#ISO-WAREZ.EFnet.log' -rwxrwxrwx 2 root root 335 Aug 20 2004 '#evilfork.EFnet.log' -rwxrwxrwx 2 root root 589 Aug 20 2004 '#LuxShell.UnderNet.log' -rwxrwxrwx 2 root root 1.3K Aug 20 2004 '#mp3xserv.UnderNet.log' -rwxrwxrwx 2 root root 284 Aug 20 2004 '#ushells.UnderNet.log' -rwxrwxrwx 2 root root 464 Aug 20 2004 '#Elite.Hackers.UnderNet.log' -rwxrwxrwx 2 root root 265 Aug 20 2004 '#houston.UnderNet.log' -rwxrwxrwx 2 root root 688 Aug 20 2004 '#Chataholics.UnderNet.log' -rwxrwxrwx 2 root root 285 Aug 20 2004 m5tar.UnderNet.log -rwxrwxrwx 2 root root 9.2K Aug 20 2004 '#CyberCafe.UnderNet.log' -rwxrwxrwx 2 root root 578 Aug 20 2004 '#thedarktower.AfterNET.log' -rwxrwxrwx 2 root root 263 Aug 20 2004 '#funny.UnderNet.log' drwxrwxrwx 1 root root 4.0K Aug 25 2004 ..

Drei IRC-Channels, die der Nutzer betreten hat, sind:

```
#ISO-WAREZ.EFnet  
#evilfork.EFnet  
#LuxShell.UnderNet
```

Diese kannst du anhand der Log-Dateien im Ordner logs/ erkennen.

23. Das Programm Ethereal (ein bekanntes Sniffing-Tool zum Abfangen von

Netzwerkpaketen) war ebenfalls installiert. o Die gesammelten TCP-Pakete werden standardmässig im Ordner „Eigene Dateien“ gespeichert. o Frage: Wie heisst die Datei, die abgefangene Daten enthält? `

```
(base) jf18j492@aitne:/mnt/SCHARDT_001_008/Documents and Settings/Mr. Evil/Application  
Data/Ethereal$ cat recent
```

Recent settings file for Ethereum 0.10.6.

This file is regenerated each time Ethereum is quit.

So be careful, if you want to make manual changes here.

```
##### Recent capture files (latest last) #####
```

```
recent.capture_file: C:\Documents and Settings\Mr. Evil\interception
```

```
##### Recent display filters (latest last) ##### ... ` Die Datei recent aus dem Ethereum-Ordner  
zeigt:
```

```
Die abgefangene Datei heit: C:\Documents and Settings\Mr. Evil\interception
```

Das ist der Speicherort der Capture-Datei mit den aufgezeichneten Netzwerkpaketen.

24. Durch die Ansicht dieser Datei im Textformat lsst sich viel ber die betroffene

Person erkennen. o Frage: Welchen Typ von drahtlosem Computer benutzte die betroffene Person? Die Details zeigen, dass die betroffene Person ein mobiles Gert mit Windows CE (Pocket PC) Version 4.20 verwendet hat, das auf einem Intel PXA255 CPU basiert.

Das ist ein klassisches PDA-/Handheld-Gert mit Farbdisplay (240x320 Pixel) und Internet Explorer 4.01 kompatiblen Browser.

Antwort auf Frage 24: Der Typ des drahtlosen Computers ist ein Pocket PC (Windows CE-basiert), also ein PDA (Personal Digital Assistant).

25. Welche Webseiten rief die betroffene Person auf?

```
strings interception | less > interception_strings.txt grep -o -E "https?/[[:alnum:]].~/?  
#@interception_strings.txt&'()*+,%=-]" interception_strings.txt > urls.txt
```

```
awk '!seen[$0]++' urls.txt > urls_unique.txt http://mobile.msn.com/hm/folder.aspx?

27. Das E-Mail-Programm Yahoo Mail speichert E-Mails unter welchem Dateinamen?

Yahoo Mail selbst speichert keine E-Mails unter einem bestimmten Dateinamen, da es webbasiert ist. Wenn E-Mails lokal gespeichert sind, dann hängt der Dateiname vom verwendeten E-Mail-Client ab. Falls doch

mail daten auf dem computer gespeichert sind sind es wohl cookies oder local Storage daten vom browser.

28. Wie viele ausführbare Dateien (.exe) befinden sich im Papierkorb?

```
ls /mnt/SCHARDT_001_008/RECYCLER/S-1-5-21-2000478354-688789844-1708537768-1003/ Dc1.exe  
Dc2.exe Dc3.exe Dc4.exe desktop.ini INFO2 4 .exe dateien
```

29. Sind diese Dateien tatsächlich gelöscht?

Ja, diese Dateien wurden gelöscht, sind aber noch nicht endgültig entfernt. Erklärung:

Windows verschiebt gelöschte Dateien in den Papierkorb, statt sie sofort vom Dateisystem zu löschen. Dabei passiert Folgendes:

Die Datei wird nach RECYCLER/<SID>/ (hier: S-1-5-21-...-1003) verschoben.

Sie erhält einen neuen Namen (z. B. Dc1.exe).

Die Datei INFO2 enthält Metadaten, z. B. den ursprünglichen Pfad und Löszeitpunkt.

Fazit:

Die .exe-Dateien im RECYCLER-Verzeichnis:

sind als gelöscht markiert,

könnten vom Benutzer wiederhergestellt werden,

sind noch physisch vorhanden (also nicht endgültig gelöscht).

30. Wie viele Dateien sind laut Dateisystem als gelöscht markiert?

➡ Es sind 4 Dateien als gelöscht markiert (Dc1.exe bis Dc4.exe).

31. Führen Sie eine Antivirenprüfung durch:

o Frage: Wurden Viren auf dem Computer gefunden? `sudo apt update sudo apt install clamav
sudo freshclam clamscan -r --infected --remove=no /mnt/SCHARDT_001_008/ >
infected_files.txt`
